Sensitivity Factor	Sensitivity 1 - 7 (one being least sensitive, seven being most sensitive)	Confidence 1 - 5 (one being least sensitive, five being most sensitive)
Generalist/Specialist		1 Very Poor
Physiology		
Life History		
Habitat		
Dispersal Ability		
Disturbance Regimes		
Ecology		
Non-Climatic		
Other (weight)		

Sensitivity Score : 0 Low

Sensitivity Score

100 * [(0.5 *(Dispersal Distance + Dispersal Barriers) + Disturbance Regimes + (0.5 * Generalist/Specialist) + Physiology + (0.5 * Life History) + Sensitive Habitats + Ecology + Non-Climatic Stressors + (Other * Weight) / 49 + (7 * Weight)]

Note: if Sensitive Habitats are identified, this factor automatically gets a value of seven, otherwise it remains zero.

Confidence Score : 0

Confidence Score

The Confidence Score is an average of the Confidence column above.

Overall User Ranking:

Common Name:
Steelhead - Upper Willamette River Winter Run

Is this Species completed:
No

Taxonomy

This is a description of the whole group

Scientific Name:
Oncorhynchus mykiss pop. 33

Realm:
Freshwater

Kingdom:
Animal

Phylum:
Craniata

Class:
Actinopterygii

Order:
Salmoniformes

Family:
Salmonidae

Genus:
Oncorhynchus

Global Rank:
G5T2Q (2000)

Rounded Global Rank:
T2 - Imperiled

IUCN:
Not Listed

US Endangered Species Act Code:
Threatened

TGTID:
105411000

Species Element Code:
AFCHA02138

Species Global ID:
105411

Generalist/Specialist

Confidence in your assessment of the degree to which the species is a generalist or specialist:
1 Very Poor
