Other (weight)

Sensitivity Score : 0 Low

## Sensitivity Score

$100 * [(0.5 * (\text{Dispersal Distance} + \text{Dispersal Barriers}) + \text{Disturbance Regimes} + (0.5 * \text{Generalist/Specialist}) + \text{Physiology} + (0.5 * \text{Life History}) + \text{Sensitive Habitats} + \text{Ecology} + \text{Non-Climatic Stressors} + (\text{Other} * \text{Weight}) / 49 + (7 * \text{Weight})]$

Note: if Sensitive Habitats are identified, this factor automatically gets a value of seven, otherwise it remains zero.

Confidence Score : 0

## Confidence Score

The Confidence Score is an average of the Confidence column above.

Overall User Ranking:

**Author Expertise:**

1 (low)

**Common Name:**

Pronghorn

**Is this Species completed:**

No

— Taxonomy —

This is a description of the whole group

**Scientific Name:**

*Antilocapra americana*

**Geography:**

Idaho

**Realm:**

Terrestrial

**Kingdom:**

Animal

**Phylum:**

Chordata

**Class:**

Mammalia

**Order:**

Artiodactyla

**Family:**

Antilocapridae

**Genus:**

*Antilocapra*

**Global Rank:**

G5 (1996)

**Rounded Global Rank:**

G5 - Secure

**IUCN:**

Least Concern ver. 3.1 - 2008

— Sensitive Habitats —

**Level of philopatry:**

low
